Focusing on fresh ingredients and natural processes our doughs are made daily without any preservatives or artificial flavours, just flour, water, yeast, olive oil, seasoning and herbs. Our recipe is modified slightly each day taking into consideration air, water and flour temperatures, relative humidity and the quantity of doughs required.

Rolling each dough to order the pizzas are then assembled on aluminium trays before being slid off the tray into the oven, with a temperature in excess of 375oc. Our pizzas are cooked on the stone floor of the oven – this helps develop a crisp crust, impart unique characteristic flavours and the aromatics of the burning wood.

Our pizzas are not "perfect", cooking on a stone oven floor, pizzas take on their own unique characteristic, i.e. one side a bit darker than the other, toppings tend to scatter randomly and the textures vary.

Rather than "Play" with our doughs rolling and docking to ensure a perfect round shape, we prefer a rustic look, simply rotating our doughs in the oven as they cook. As a result, pizzas are no identical.

Most of our ingredients are placed on the pizza raw and retain a crisp fresh flavours and texture, with no added salt. We use 100% mozzarella cheese which results in a lighter and less oily pizza.

We can do range of functions and events upon request.
